

# The University of Melbourne

## Quality of Teaching Survey – 2007 Outcomes by Field of Education

The purpose of this paper is to make available to the community in general, information on the perceptions of University of Melbourne students on the quality of teaching in their subjects. The attached tables show the 2007 outcomes for the University of Melbourne's Quality of Teaching Survey by Field of Education and should be read in conjunction with these notes.

### ***Purpose of the Survey***

The University of Melbourne's Quality of Teaching survey was developed primarily to provide a measure of assurance at University level of the quality of its teaching. The survey looks broadly at the quality of teaching in the subject, students' progress and involvement with staff and other students, the use of information technology, and students' overall satisfaction with the quality of their learning experience. The survey provides an opportunity to provide feedback to the Academic Board through its Teaching and Learning Quality Assurance Committee (TALQAC) as well as to individual faculties and departments.

### ***Survey Scope***

The survey is mandatory each semester in all undergraduate and postgraduate 'taught' subjects. Exemption from the survey is available for subjects with fewer than four students, where it is not practical to administer the survey, and for special circumstances. Faculties are responsible for putting into place alternative arrangements where student views can be expressed for subjects exempted from the survey.

### ***Questionnaire***

The Quality of Teaching questionnaire consists of nine questions common to all subjects. Faculties and departments may augment the questionnaire with up to fifteen additional questions to address subject, discipline or department specific issues. Responses are provided on a five point Likert scale ranging from strongly disagree (1) to strongly agree (5). The nine common questions are:

- CQ1. I had a clear idea of what was expected of me in this subject.
- CQ2. This subject was well taught.
- CQ3. This subject was intellectually stimulating.
- CQ4. I received helpful feedback on how I was going in this subject.
- CQ5. In this subject, teaching staff showed an interest in the academic needs of the students.
- CQ6. I felt part of a group of students and staff committed to learning in this subject.
- CQ7. There was effective use of computer-based teaching materials in this subject.
- CQ8. Web-based materials for this subject were helpful.
- CQ9. Overall, I was satisfied with the quality of the learning experience in this subject.

### ***Reporting and dissemination of results***

Overall results are reported to the Academic Board through the Teaching and Learning Quality Assurance Committee. Faculty results are provided to individual faculties. Individual departments are responsible for developing arrangements to ensure that results can be discussed with students and staff, and in a manner which ensures that legitimate concerns about confidentiality will be met. The outcomes of the survey are also considered in a range of University quality assurance activities such as faculty or department performance reviews.

### ***Data notes***

Subject outcomes are grouped into disciplines on the basis of the subject's Field of Education code as reported to the Department of Education, Employment and Workplace Relations (DEEWR).

A discipline's mean rating is a weighted average of the subjects within that discipline.

Disciplines where there were fewer than 30 responses are not shown separately but their outcomes are included in the broad discipline subtotal and subject level subtotal.

The variation in outcomes between disciplines may be attributed to a range of factors including curricula, modes of teaching and study, assessment methods, grading practices, course structures, class size, response rates and so on. Interpretation of apparent differences should be approached cautiously, and are best suited to similar disciplines taught in similar circumstances.
